Desktop Virtualization

Physical on-premise desktop computer infrastructures no longer make sense for Enterprise IT. Not only is it expensive, less secure and maintenance-heavy, on-premise infrastructures also cannot effectively support the business needs of their organizations.

Virtualize your Desktops and Deliver them On-Demand to Any User – Anywhere

Deliver a high definition user experience by dynamically assembling each user's unique desktop from pristine components — operating system, applications, content and user profiles.

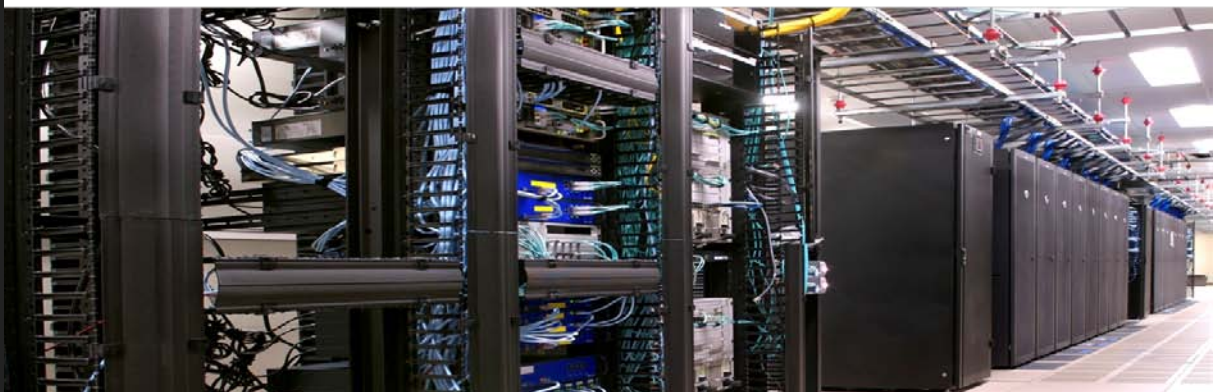

Alliance Technology Groups offers dynamic Cloud based desktop solutions that offer:

- ✓ Rapid time to value
- ✓ State of the art virtual desktop technologies
- ✓ Customization – dynamic profiles and content
- ✓ Improved manageability
- ✓ Streamlined desktop deployment
- ✓ Increased Flexibility
- ✓ Improved data protection
- ✓ Cost Savings – Reduces CAP EX

Alliance Technology Group has a proven history of implementing desktop virtualization solutions that helps our customers develop innovative, high-value solutions. Each environment has unique needs, and our extensive experience allows us to work with our customers to develop solutions that leverage products that will best meet their requirements, as well as offer a high level of integration and value.

Take the Cost and Complexity out of Deploying and Managing Desktops

When designing desktop virtualization solutions we are able to utilize the following manufacturer's products:

Streamline your Desktop Lifecycle Management

Revolutionize the Way you Manage and Deliver Desktop

- ✓ **Hosted Computing:** Provision your Desktop solution in a private secure environment, Virtual Desktop Infrastructure includes High Availability and backup ensuring minimal downtime for end users.
- ✓ **Scalability:** Hosted Virtual Desktop Infrastructure enables real time scale up and down.
- ✓ **Serviceability:** Virtual Desktop as Service enables non-disruptive migrations of virtual machines from one physical server to another, ensuring that hardware can be serviced without any service interruption.
- ✓ **Security:** Improve security by centralizing desktop and data management into a Carrier grade datacenter.
- ✓ **Cost savings:** Virtualization enables significant increases in resource utilization while preserving customization for the customer, while reducing TCO by up to 40%.

Alliance's Cloud-based desktop solutions provide the ultimate flexibility for deploying desktops and are ideal for many applications and industries:

- Departmental Workgroups
- Colleges, Universities and School Districts
- Hospitals and Healthcare Organizations
- Law Firms and Professional Organizations
- Remote Workforce

Alliance Technology Group is a team of highly skilled practitioners and leading provider of managed services, specializing in cloud computing and infrastructure as a service solutions. To our customers in the private and public sectors, we have become the trusted partner to cost-effectively and reliably harness the full potential of the Cloud.
